

AMENDMENTS TO THE CLAIMS:

The listing of claims will replace all prior versions and listings of claims in the application.

LISTING OF CLAIMS:

1 1. (currently amended) Data backup equipment for a
2 portable telephone such as a cellular phone, a personal
3 handy phone, a car telephone, a maritime mobile
4 radiotelephone machine[,] or a satellite cellular phone
5 machine ~~or the like~~, comprising a charging section, a
6 data backup section, a data feedback section and a data
7 selection section, said charging section having a
8 charging connection terminal to be connected to a
9 charging terminal of said portable telephone to charge a
10 battery in said portable telephone, ~~and a~~ said data
11 backup section having an information transmission
12 interface part to be connected to an external information
13 instrument connection interface part of said portable
14 telephone to read and store from said portable telephone
15 ~~such data as telephone numbers and others~~ set and stored
16 through said information transmission interface part in
17 said portable telephone, said data backup section
18 ~~characterized by~~ automatically reading and storing said
19 data stored in said portable telephone therefrom in
20 association with a charging operation when said charging
21 section begins to charge said battery in said portable

22 telephone, said feedback section feeding back said data
23 read and stored from said portable telephone by said data
24 backup section through said information transmission
25 interface part to said portable telephone to again store
26 said data in said portable telephone, said data to be
27 read and stored from said portable telephone by said data
28 backup section also including control or setup function
29 information required at least for an operation of said
30 portable telephone and a telephone call information such
31 as a telephone number information, an arrival telephone
32 number information, a dispatch telephone number or a
33 telephone call time, said data selection section
34 operating to select and set any of said data to be read
35 and stored from said portable telephone by said data
36 backup section or said data to be fed back and again
37 stored by said feedback section to said portable
38 telephone.

2. (cancelled).

3. (cancelled).

4. (cancelled).

1 5. (currently amended) Data backup equipment for a
2 portable telephone as set forth in claim [3] 1, further

3 comprising a data process section to automatically
4 process said data read from said portable telephone under
5 predetermined conditions whereby said feedback section
6 feeds back to said portable telephone said data processed
7 by said data process section.

1 6. (currently amended) A method of backing up data
2 set and stored in a portable telephone such as a cellular
3 phone, a personal handy phone, a car telephone, a
4 maritime mobile radiotelephone machine[,] or a satellite
5 cellular phone machine ~~or the like~~, by reading and
6 storing said data in an external storage, ~~said method~~
7 ~~characterized by preparing~~ comprising providing a charger
8 having a charging connection terminal to be connected to
9 a charging terminal of said portable telephone as an
10 external storage and an information transmission
11 interface part to be connected to an external information
12 instrument connection interface part of said portable
13 telephone, ~~and~~ automatically reading said data set and
14 stored in said portable telephone ~~therefrom~~ through said
15 information transmission interface part to store ~~them~~
16 said data in said charger in association with a charging
17 operation when said charger begins to charge said battery
18 in said portable telephone through said charging
19 terminals, said data to be read and stored including data
20 of a control or setup function information further

21 including at least for an operation of said portable
22 telephone and a telephone call information such as a
23 telephone number information, an arrival telephone number
24 information, a dispatch telephone number or a telephone
25 call time, and arbitrarily selecting and setting any of
26 said data to be read and stored from said portable
27 telephone or said data to be fed back and again stored to
28 said portable telephone, said data to be read and stored
29 in said portable telephone are read and stored from said
30 portable telephone.

1 7. (previously presented) A method of backing up
2 data for a portable telephone as set forth in claim 6,
3 further comprising the step of feeding back said data
4 read and stored from said portable telephone through said
5 information transmission interface part to said portable
6 telephone to again store said data in said portable
7 telephone.

8. (cancelled).

1 9. (currently amended) A method of backing up data
2 for a portable telephone as set forth in claim ~~8~~ 6,
3 further comprising the step of ~~arbitrarily selecting and~~
4 ~~setting any of said data to be read and stored from said~~
5 ~~portable telephone or said data to be fed back and again~~

6 ~~stored to said portable telephone~~ automatically
7 processing said data read from said portable telephone
8 under predetermined conditions whereby said processed
9 data are fed back to said portable telephone.

1 10. (currently amended) A method of backing up data
2 for a portable telephone as set forth in claim 8 7,
3 further comprising the step of automatically processing
4 said data read from said portable telephone under
5 predetermined conditions whereby said processed data are
6 fed back to said portable telephone.

1 11. (currently amended) Data backup equipment for a
2 portable telephone as set forth in claim 2 1, further
3 comprising a data selection section to select and set any
4 of said data to be read and stored from said portable
5 telephone by said data backup section or said data to be
6 fed back and again stored by said feedback section to
7 said portable telephone.

1 12. (currently amended) Data backup equipment for a
2 portable telephone as set forth in claim 2 1, further
3 comprising a data process section to automatically
4 process said data read from said portable telephone under
5 predetermined conditions whereby said feedback section

6 feeds back to said portable telephone said data processed
7 by said data process section.

1 13. (currently amended) Data backup equipment for a
2 portable telephone as set forth in claim 4 1, further
3 comprising a data process section to automatically
4 process said data read from said portable telephone under
5 predetermined conditions whereby said feedback section
6 feeds back to said portable telephone said data processed
7 by said data process section.

1 14. (previously presented) Data backup equipment
2 for a portable telephone as set forth in claim 11,
3 further comprising a data process section to
4 automatically process said data read from said portable
5 telephone under predetermined conditions whereby said
6 feedback section feeds back to said portable telephone
7 said data processed by said data process section.

1 15. (previously presented) A method of backing up
2 data for a portable telephone as set forth in claim 7,
3 further comprising the step of arbitrarily selecting and
4 setting any of said data to be read and stored from said
5 portable telephone or said data to be fed back and again
6 stored to said portable telephone.

16. (cancelled).

17. (cancelled).

18. (cancelled).
